Power-Assisted Liposuction System

Compare PAL to Traditional Liposuction

Fast

Clinical studies comparing the PAL system to manual liposuction found that PAL aspirates 31% more volume per minute leading to a 35% reduction in procedure time.¹

Precise

PAL is proven to reduce surgeon fatigue by 49%, offering a safer and more precise procedure. These benefits result in superior outcomes and faster healing and recovery rates for patients.¹

Viable

The quality of PAL-harvested adipocytes has been shown to be similar to those harvested by manual liposuction; and PAL produces higher yields of loosely adherent stem cells, which may improve graft retention.^{2,3,4}

Before

After

"It's dramatic how much better patients feel, how much more effectively we can treat them, how much more satisfied they are, and how far superior the results are compared to [traditional liposuction]."

- Dr. Gerhard Sattler

PAL[®] Power-Assisted Liposuction System

PAL Powered Handpiece | PAL-650

The PAL-650 from MicroAire[®] is a powerful, precision instrument designed for small- or large-volume fat extraction, body contouring and fat harvesting.

PAL's smooth reciprocating cannulas glide through tissue, reducing the amount of physical effort required during liposuction, thus reducing O.R. time.¹

Reciprocation increases control, helping the surgeon gently guide the cannula with greater accuracy, even through dense fibrous tissue. The result is a faster procedure, less fatigue and more precise outcomes.¹

PAL Cannulas

Small variations in the number of ports, as well as their size and location on the cannula, can have a significant impact on performance and outcomes. MicroAire has developed several port configurations based on clinical studies and surgeon feedback.

See the complete listing of PAL Cannulas in the PAL Cannula Brochure online at www.microaire.com.

MicroAire Standard Electric Console | 5020

Weight	14 lbs (6.35 kg)
Height	6" (15.24 cm)
Footprint	12"x 14" (30.48 cm x 35.56 cm)
Electrical	300 W, 100-240 V, 50/60 Hz

Simple touch-screen interface

Controls two PAL handpieces at once

PAL is the most widely used and *preferred* alternative to manual liposuction.⁵

Less Bruising and Swelling¹

Reduced Surgeon Fatigue¹

Faster Procedure and Patient Recovery¹

Proven Cell Viability^{2,3,4}

PAL Accessories

PAL LipoTower® (USA Only) | ASP-1021

- Powerful surgical cart used for tumescent liposuction
- Strong, reliable pumps for both infiltration and aspiration
- Touchscreen interface and optional integrated PAL control system
- The only UL®-listed liposuction cart on the market

Vacuum Pump	Dual 1/4-Horsepower, Rotary Vane
Vacuum Flow Rate	3.0 SCFM (0.08 m ³ /min)
Vacuum Pressure	0–29 in/Hg (0–736 mm/Hg) at Sea Level
Infiltration Pump	Peristaltic
Infiltration Flow Rate	50–600 ml/min
Weight	185 lbs (84 kg)
Height	4' (1.2 m) pole down 7' (2.1 m) pole extended
Footprint	2' x 2' (0.6 m x 0.6 m)
Electrical	120 V, 60 Hz (UL-Listed)

Sterilization Case | PAL-500

- Accommodates two handpieces, electric cable and up to ten cannulas
- Fits in most standard autoclaves

LipoFilter® Gravity-Decant Fat Processing System | ASP-CAN-2S

- Three-liter fat harvesting and separation system
- Large-volume decanting and washing
- No centrifuge needed
- Works with any lipo system
- Sterile-packed, single-use

PAL Wand | PAL-730

- Ergonomic manual handpiece for sensitive areas (such as the neck and back)
- Compatible with all PAL cannulas

Ordering Information

PAL Component Part Numbers

PAL-650	PAL Powered Handpiece
5006-PAL	PAL Cable (for use with the 5020 console)
5020	PAL Electric Console

PAL Accessories Part Numbers

CAP-600E	PAL Washer Disinfectant Cap
PAL-500	PAL Sterilization Case
PAL-700	PAL Single-Use Luer Adapter
PAL-730	PAL Wand Manual Handpiece
PAL-1200	PAL 12 ft (3.66 m) Aspiration Tubing (5PK)
ASP-1021	LipoTower® (USA only)
ASP-CAN-2S	LipoFilter®
ASP-ADP-2	Adapter — Toomey-to-Luer Syringe
ASP-ADP-3	Adapter — Toomey-to-Luer Needle
