BY MICROAIRE

LipoFilter[®] Gravity-Decant
Fat Processing System

LipoFilter is a sterile-packaged gravity-decant fat processing system that meets all your large-volume harvesting needs.

Designed for in-line compatibility with PAL® by MicroAire as well as any traditional suction-assisted liposuction systems (SAL), the LipoFilter offers an innovative approach to filtering adipose tissue using a trouble-free, disposable canister employing a gravity-decant fat processing system.

With a usage capacity of 2500mL, the LipoFilter can meet all of your large volume harvesting needs at an affordable price.

A removable cap on the top of the canister for easy filling with prewash fluid, and a unique vent tube provides complete evacuation of fluids after separation is achieved. The vent system also protects fat cells from unnecessary G-forces that occur with other methods.

LipoFilter Stand & Clamp

ASP-CAN-2R (Stand)
ASP-CAN-2C (Clamp)

LipoFilter Aspiration Canister

ASP-CAN-2S (Includes 60cc Toomey Syringe)

ASP-CAN-NT (Syringe Not Included)

The straightforward design of the LipoFilter provides an effective, affordable fat processing system focused on ease of setup and ease of use.

- 3-liter (3000ml) canister
- Compatible with any aspiration system
- Includes filtering canister tubing
- Closed, sterile system

Adapter, Toomey-to-Luer Syringe | ASP-ADP-2

Adapter, Toomey-to-Luer Needle | ASP-ADP-3

The LipoFilter is designed and manufactured by MicroAire with your patient's safety in mind.

**NOTE: Syringe not included
with ASP-CAN-NT**
